Atlantic City Sign Show! December 1-3, 2011

TYRRELLTECH JEOPARDY

Here at TyrrellTech, the only thing we love more than a great show theme is getting customers outfitted with the right and best printer for their production needs.

So, come see TyrrellTech in this year's USSC Show in Atlantic City, NJ... booth 401, you won't be able to miss us. And you will find out that, when it comes to the best in digital printing systems and support, the answer is, "Who is TyrrellTech, Alex?"

KUDOS ROLAND INK CUSTOMERS!

I don't like to start my morning with water on my cheerios or diesel fuel in my gas-powered car. In that same vein, you don't want to start your Roland's day without official, certified Roland ink in its tubes. Running your Roland with OEM (Original Equipment Manufacturer) inks guarantees that you will have consistent color, clean warranty coverage, and reliable results. It is truly the only way to go.

For our Roland printer owners who have chosen to take this path, we want you to know that you are being rewarded! Roland recently increased their warranty prices. We have put together a program where you can get a discount for being a Roland ink user, and an EVEN BIGGER discount for buying those Roland inks from TyrrellTech! TyrrellTech Roland ink users can save as much as $500 off of the Roland contract pricing.

On top of the money savings and the piece of mind that comes from using OEM inks, there is another benefit. With your discounted TyrrellTech service contract, you get coverage on some parts that are otherwise deemed consumable, including wipers and cap tops that the technician replaces while on site. That, paired with the preventative maintenance calls that you get twice a year, makes it a no-brainer-- Roland inks and TyrrellTech warranty coverage for your printer are the way to go.

Thank you to those customers who have stayed true and loyal Roland and TyrrellTech ink customers. Kudos to you, this is your reward!

"Success is almost totally dependent upon drive and persistence. The extra energy required to make another effort or try another approach is the secret of winning." -Dennis Waitley

Rimage Media Reader

Files come to you in many formats and on various media types and devices. You can easily bring them into your disc publishing system with the Rimage Media Reader; an accessory to any Rimage Disc Publisher, Rimage Disc Authoring Solution or Rimage Copy Station.

Rimage 5400N with Media Reader

Use the Media Reader in conjunction with your disc publisher to ingest pictures, data files, or any information stored on memory cards or optical discs. The Rimage Media Reader is designed to work seamlessly with disc publishers without distracting you from your workflow.

It is fast and simple. Insert your disc, SD card or other storage device into the Media Reader and use QuickDisc software, the Disc Copy Station 'Device Offload' button, or your normal file access process to import files.

Move Up to Rimage Promotion!

Rimage manufactures a top of the line, one of a kind CD/DVD publishing solution. Burn and print discs all in one unit!

Through December 16, 2011, Rimage will take $2000 off of the Rimage Professional Series price. For a limited time, you can obtain a Rimage Professional 3400 system for less than $5,000 or receive a Rimage Professional 5400N embedded system for less than $10,000.

New Wrapping Product from Oracal!

ORACAL USA is pleased to announce ORAJET Series 3751RA Wrapping Cast Digital Media with Rapid-Air Technology.

Series 3751RA is an ideal choice for challenging vehicle wraps...
Why? Check out this list of features!

* Low initial tack
* Repositionable, grey adhesive
* Cast construction
* Advanced air release system for highly conformable performance over difficult curves, corrugations, and rivets
* 8-year life
* 2.25-mil thickenss
* Smooth white gloss surface
* Little to no adhesive residue for up to four years

This new product is amazing, and just right for your vehicle wrapping needs. The low initial tack makes application easy and the strong bond will keep the graphics in place long term.

RECYCLED AND RECYCLABLE

UV PRODUCTS OVERVIEW

Direct Color Systems 1014 & 1024

WHAT IS GREAT FOR SMALL FORMAT UV PRINTING, ALEX?

Direct Color Systems®

The Direct Jet 1014UV and 1024UV printers from Direct Color Systems® are unique offerings within the small-format UV flatbed market. These new UV printers are extremely versatile, offering large table sizes and height allowances at an economical price point. They produce incredibly crisp text and vibrant, full-color images with outstanding solvent and abrasion durability on a variety of substrates, from wood and stainless steel to ceramic tiles, plastics and glass.

The Direct Jet UV printers' white ink creates a very opaque image, allowing users to print onto virtually any colored substrate and produce amazing, bright colors with a white under base. The white ink is also extremely user friendly. It is stationed in cartridges on top of the print head, remaining in constant motion to correctly maintain the white pigment in suspension.

Contact TyrrellTech to see samples and learn more.

HP FB Series Production Flatbed Printers

WHAT IS GREAT FOR UV PRINTING PRODUCTION WITH WHITE OPTION?

The HP FB Series of flatbed UV printers is a sign shop's dream when it comes to fast, reliable production. This machine easily prints edge to edge on precut coroplast for high volume needs, and it will do an amazing quality print sub-surface on clear acrylic. That's right, all in one machine!

The HP flatbed printers, both the 64" FB500 and the 98" FB700, can help you fulfill many requests. Signage, point of purchase, double sided direct-to-board prints, the need to print white ink, and so much more.

Come to TyrrellTech today to see an FB500 in action!

Roland LEF, LEC & LEJ Printers

WHAT IS GREAT FOR UV PRINTING WITH SPECIAL EFFECTS?

One of the most advanced and affordable benchtop UV printers in its class, the LEF-12 has a maximum print area of 12 inches by 11 inches, and can handle solid objects up to 3.94 inches thick. You can even add stunning graphics for high visual impact and unique dimensional effects, whether printing logos or any type of artwork on a vast array of items, including thumb drives, pens, cell phone covers, laptops and more. You're only limited by your imagination.

White ink can be added as a spot color, or a flood behind CMYK to make colors pop on dark backgrounds or clear materials such as acrylic. With the addition of Clear Coat ink, gloss or matte finishes can be produced for enhanced visual and tactile effects.

As the world's first UV inkjet printer/cutters, Roland's DPI award-winning VersaUV LEC series quickly revolutionized the packaging prototype and short-run label industries. For the first time, professionals could print CMYK plus white and clear inks for varnishing and embossing effects on virtually any substrate and then crease, contour cut or perf-cut their designs, all on one device through one seamless workflow. Now, our 54" model takes your creativity to an even larger scale.

The LEC is available in both 30" & 54" sizes. Call to learn more about how you can produce packaging prototyped with high quality, white spot color, and textured gloss overlays!

As a hybrid printer, the LEJ-640 accepts both roll and flat media substrates from films to Gatorfoam. Now with just one device, you can explore a world of applications, from packaging prototypes and POP to wide-format signage, décor, exhibits and window displays.

Layers of clear coat finish your graphics with custom patterns and embossing effects, perfect for premium brands.

This machine can print high qualtiy images with UV inks onto substrates up to 1/2" thick and 64" wide. See this machine in action at TyrrellTech and learn how adding Roland flatbed printing to your capabilities can do so much more than just allow you to print onto boards! 888-865-0300.

ENGRAVER CORNER

Universal Laser

The largest in the VLS platform line, the VLS6.60 has a wide and deep engraving area that can accommodate a variety of materials. The VLS6.60 offers a choice of six laser cartridges ranging in power from 10-60 watts. The material processing envelope of 32" x 18" x 9", 5,184 in3 (813 x 457 x 229mm, 84,950 cm3) makes the VLS6.60 a versatile laser engraving solution for most award and sign shops. In addition to the basic capabilities of the machine, there are a number of patented Uniquely Universal features that are only available from Universal Laser Systems. Laser Interface+ and Rapid Reconfiguration are Uniquely Universal features that come standard on the VLS6.60, and a number of additional options are available to enhance your laser processing capabilities. All Universal laser platforms use interchangeable components, giving you the ability to tailor your system to fit your needs.

TyrrellTech Thanksgiving

'Tis the season to be thankful for the blessing in our lives. We at TyrrellTech are thankful for a lot of things. Yes, there are days when installed machines don't work and media gives us a fit. Not everything always goes smoothly. But in the grand scheme of things, we get to work with customers that we enjoy, colleagues we like working side by side with, and we get to sell reliable products that we trust. Having any of those pieces of the puzzle not in place would make for a much less enjoyable work environment.

We spend a lot of our waking hours at our jobs. Thankfully, we at TyrrellTech can say that we often get to enjoy that time and for that, we are lucky! Thank you for being a part of this. Happy Thanksgiving and, soon enough, Happy Holidays to you and yours. Thank you.

TYRRELLTECH BIRTHDAY!

We have a November Birthday to Celebrate!
Christina Corder-Kalnasy,
Customer Service, November 26
